Chart 2: Main Menu Flow

This user flow shows where the user can go from the main menu icon, located in the header of the app. When the icon is tapped, an overlay appears that contains three buttons, Home, About, and Nutritional Information.

1. Tapping on Home button leaves overlay and opens Home Screen.

2. Tapping on the About button opens an overlay that is the "about" screen. User closes this overlay by using back button to return to expanded menu overlay.

3. Tapping on Nutritional button opens an overlay that says "content coming soon." Tapping on the "back" button on the screen overlay leaves the overlay, returns user to expanded menu overlay.

4. Tapping on the "x" icon in the lower left cover of the overlay closes the overlay, returning user to Home Screen.
